EXPERIENCE

ASCENTX (Chandigarh)   October 2016 - Present

Software Development Engineer : Worked in Agile Environment in a startup based company, wearing multiple hats performing multiple roles for all round development of the product.
PRODUCT : SPIRE

(Aug-17 to till Date)
Java Spring: Wrote **RESTful API** for the entire spire product using spring boot, introduced java 8 (functional programming) for the entire spire product, also used **LOMBOK** and **MAPSTRUCT** techniques to remove most of the boiler plate code. Increased my familiarity with **Java Reflection API**
Coded for the new **Micro-structure** Architecture of the company. Worked on **API GateWay** as well

(Dec-16 to July-17)
Angular based custom Library, NEAT : Built a custom library NEAT to separate business logic, in order to make the application more robust and framework independent

(Oct-16 to Dec-16)
Jenkins: Got full ownership of this **Continuous Delivery tool** , from installation to implementation.
GrayLog: Got full ownership from installation and implementation.

Worked on various systematic problems by adding various functionalities as follows:
Functionalities Added : Added functionalities like daily rollover and zipping files for the entire product.

Automation for the entire SPIRE product : Worked on automation testing of the entire SPIRE product using SELENIUM.

INFOSYS (Bangalore)   October 2014 - September 2016
Systems Engineer : Worked in **Finacle UBS**(Universal banking solution) , a product developed by INFOSYS to aid the banking services and is used in **84 countries** and serves **450 million customers.**
